Wilson Partitions products comply with the LEED for Commercial Interiors Rating System (LEED-CI). Let us help you build interior environments that are healthy, productive, and efficient.

What is LEED?

Leadership in Energy and Environmental Design or LEED is the industry-recognized, voluntary standard that defines high performance green buildings and interiors-which are healthier, more environmentally responsible and more profitable structures.

The U.S. Green Building Council (USGBC) has developed rating systems for all aspects of the built environment.

How Can Wilson Partitions Help?

By choosing Wilson Partitions interior aluminum frames, you can be sure that the aluminum material we use is recycled and manufactured on site.

The weighted scrap content of our extrusions is 47.9percent. This includes a post consumer scrap content of 11.1-percent and a post industrial scrap content of 36.8percent. The remaining 52.1-percent of the extrusions is prime aluminum.

A formal, project specific letter will be provided at your request!

EED-CI Materials & Resources Version 2.2*

Our interior aluminum frames can be used to obtain points for the following:

MR Credit 3.1: Materials Reuse 5% 1 point Use salvaged, refurbished, or reused materials such that the sum of these materials constitute at least 5%.

MR Credit 3.2: Materials Reuse 10% 1 point 5-percent beyond MR Credit 3.1.

MR Credit 4.1: Recycled Content: 10% 1 point Use materials with recycled content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 10-percent of the total value of the materials in the project.

MR Credit 4.2: Recycled Content: 20% 1 point 10-percent beyond MR Credit 4.1.

MR Credit 5.1: Regional Materials: 10% Extracted, Processed, & Manufacture Regionally 1 point

MR Credit 5.2: Regional Materials: 20% Extracted, Processed & Manufactured Regionally 1 point

LEED for New Construction & Major Renovations Handbook Version 2.2 is the most updated compliance handbook.
