

Series 225

Demountable Wall Systems

A wall system that combines design flexibility with sustainable construction

Stunning **Sustainability**

The Series 225 Demountable Wall System combines stunning design flexibility with sustainable construction. Featuring sightlines as narrow as 1 1/16", the system provides divisional privacy while allowing natural light to flow effortlessly through the space.

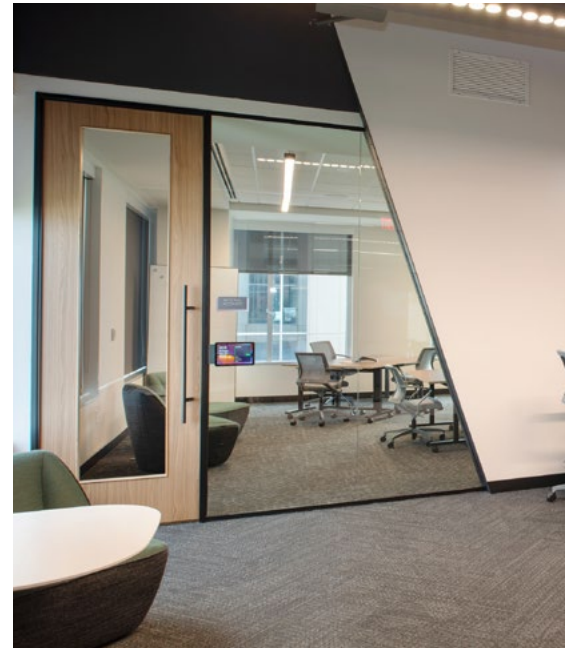

The Series 225 Demountable Wall System is completely demountable and reconfigurable to help you achieve your LEED building and sustainable construction goals.

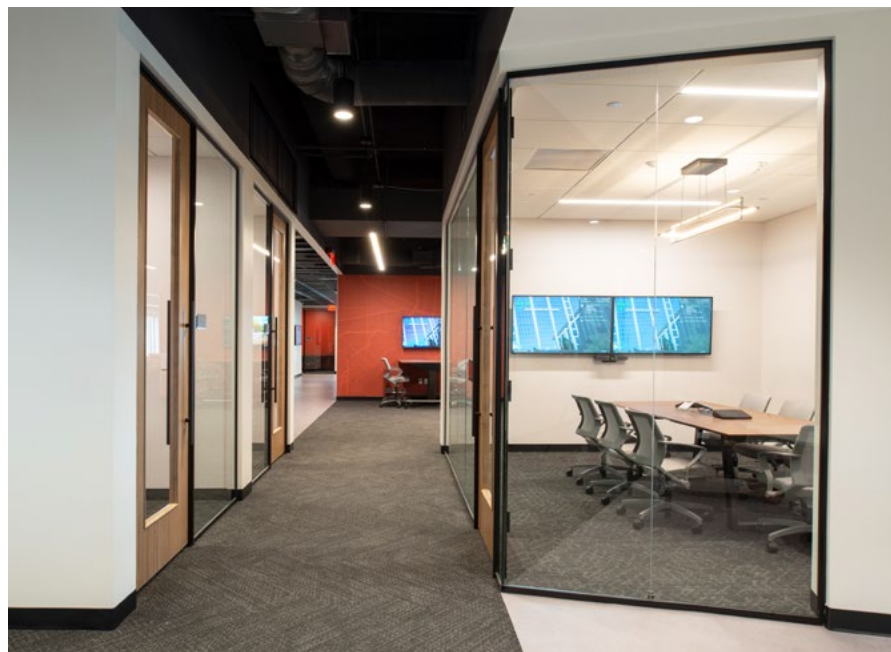

Where Aesthetics **Meet Agility**

Wilson Partitions' Series 225 Demountable Wall System is 100% customizable to give you the freedom to design and configure spaces as needs expand and change.

The Series 225 offers unmatched elegance that is otherwise unavailable with traditional drywall methods. Further customize your space by tailoring configurations and door styles to increase natural light and sophistication. Design a smooth transition between office entrances and corridors with swing and sliding door styles in aluminum, frameless glass or wood door options.

Developed for new construction and retrofit applications, the demountable system accelerates construction schedules and eases installation, so you are back in business faster.

The Industry's Complete Demountable System

The Series 225 offers a complete collection of aluminum, wood and frameless glass doors for single and dual-glazed applications. From space-saving sliding doors to sleek and narrow sightlines, the Series 225 ensures you have the flexibility to bring your vision to life.

Why the Series 225 Demountable Wall System?

Design Flexibility & Functionality

- › Sightlines as narrow as 1 1/16" for increased natural light and glass visibility.
- › Dual-glazed option provides increased noise mitigation.
- › Quick and efficient to reconfigure within spaces.
- › Unparalleled lead times.
- › Accommodates all architectural styles and layouts.

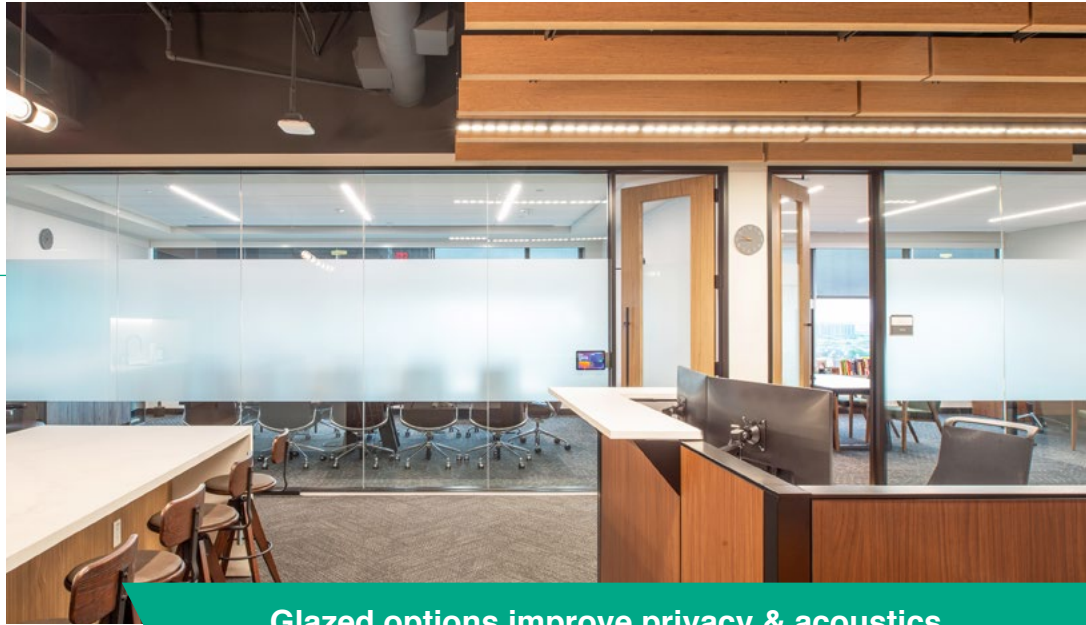

Sustainability

- › Supports LEED building targets.
- › Enhances daylighting to reduce need for artificial lighting and increases comfort for occupants.

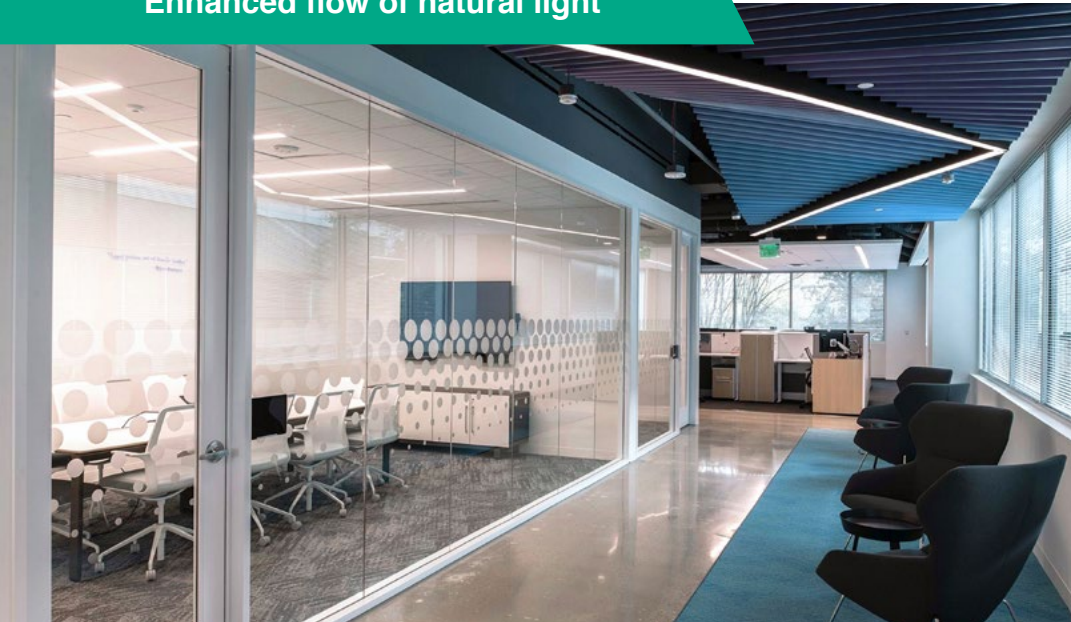

Affordability

- › Competitively priced compared to other demountable systems in the industry.
- › May qualify for accelerated depreciation under the Section 179 tax deduction, which allows owners to depreciate systems over seven years versus 39 years for drywall.
- › May allow you to recover up to a third of your project investment under Section 179.

Glazed options improve privacy & acoustics

Enhanced flow of natural light
